DETAILED ACTION

This Office action is in answer to the phone call from Mr. Eric Weierstall of 7/8/2004, and to the preliminary amendment filed June 28, 2004. Claims 37, 63, and 86 were amended, and claims 1-87 are pending.

Election/Restriction

1. Restriction to one of the following inventions is required under 35 U.S.C. 121:

- I. Claims 1-36, and drawn to **a multiple battery system selectively connecting load and/or sources**, classified in class 307, subclass 29.
- II. Claims 37-62, drawn to **a multiple battery system selectively connecting load and/or sources with time control**, classified in class 320, subclass 133.
- III. Claims 63-85, drawn to **a multiple battery system selectively connecting load and/or sources in a vehicle**, classified in class 320, subclass 104.
- IV. Claims 86 and 87, drawn to **a method of controlling a multiple battery system by determining plural cell condition**, classified in class 324, subclass 434.

2. The designs as grouped are distinct from each other since under the law a design patent covers only the invention disclosed as an entirety, and does not extend to patentably distinct segregable parts; the only way to protect such segregable parts is to apply for separate patents. See *Ex parte Sanford*, 1914 CD 69, 204 OG 1346 (Comm'r Pat.1914); and *Blumcraft of Pittsburgh v. Ladd*, 144 USPQ 562 (D.D.C. 1965). It is further noted that patentably distinct combination/subcombination subject matter must be supported by separate claims, whereas only a single claim is permissible in a design patent application. See *In re Rubinfeld*, 270 F.2d 391, 123 USPQ 210 (CCPA 1959).

In this case, the inventions are distinct, each from the other because of the following reasons: inventions I, II, III, and IV are related as apparatus and method (process) for its practice. The inventions are distinct if it can be shown that either:
a) the apparatus as claimed can be used to practice another and materially different process, or

Art Unit: 2838

b)the method as claimed can be practiced by another materially different apparatus or by hand (M.P.E.P. 806.05(e)).

In this case, the method of controlling a multiple battery system, as stated in group IV, can be practiced by an apparatus, such as one which does not require a sensor.

3. Because these inventions are distinct for the reasons given above, and have acquired a separate status in the art as shown by their different classification and recognized divergent subject matter, restriction for examination purposes as indicated is proper.

4. A reply to this requirement must include an election of a single group for prosecution on the merits, even if this requirement is traversed (37 CFR 1.143). Any reply that does not include an election of a single group will be held nonresponsive. Applicant is also requested to direct cancellation of all drawing figures and the corresponding descriptions, which are directed to the nonelected groups. Should applicant traverse this requirement on the grounds that the groups are not patentably distinct, applicant should present evidence or identify such evidence now of record showing the groups to be obvious variations of one another. If the groups are determined not to be patentably distinct and they remain in this application, any rejection of one group over the prior art will apply equally to all other groups (See ***Ex parte Appeal*** No. 315-40, 152 USPQ 71 (Bd. App. 1965)). No argument asserting patentability based on the differences between the groups will be considered once the groups have been determined to comprise a single inventive concept. In view of the above requirement, action on the merits is deferred pending compliance with the requirement in accordance with ***Ex parte Heckman***, 135 USPQ 229 (P.O. Super. Exam. 1960).

5. Applicant is reminded that upon the cancellation of claims to a non-elected invention, the inventorship must be amended in compliance with 37 CFR 1.48(b) if one or more of the currently named inventors is no longer an inventor of at least one claim remaining in the application. Any amendment of inventorship must be accompanied by a petition under 37 CFR 1.48(b) and by the fee required under 37 CFR 1.17(I).
